Lab Activity Documentation: Interactive Greeting Card

Overview

This project demonstrates how to construct an interactive, styled web card with internal section navigation using semantic HTML5 elements, CSS pseudo-classes, pseudo-elements, CSS flexbox layout, and CSS transform transitions.

Key Learning Outcomes

1. Semantic HTML Structure

- **Card Container:** Utilized a `<div class="card">` to group elements representing the core card component.
- **Navigation Links:** Placed internal anchor tags (`<a href="#send">` and `<a href="#share">`) inside a container (`.card-links`) to route users to relevant page sections.
- **Content Sections:** Used the `<section>` element with corresponding `id` attributes (`#send` and `#share`) to act as targets for internal page navigation.

2. Pseudo-Elements (`::before` & `::after`)

Dynamically inserted emoji decorations around the primary heading without cluttering the raw HTML structure:

3. Interactive Link States (Pseudo-Classes)

Applied pseudo-classes to enhance user experience during interactions:

- `:hover`**:** Changes the anchor button background color to `orangered` on mouseover.
- `:active`**:** Reverts background color to `midnightblue` while actively clicked.
- `:focus`**:** Highlights the element with a `2px solid yellow` outline for keyboard accessibility.
- `:visited`**:** Dynamically alters link text color to `crimson` once a section link has been visited.

4. Layout & CSS Transitions

- **Flexbox Layout:** Positioned call-to-action links evenly using `display: flex;` and `justify-content: space-around;`.
- **Transforms & Transitions:**
  - Applied smooth scaling (`transform: scale(1.1);`) and background color shifts (`background-color: khaki;`) when hovering over the card element.
  - Added visual feedback to section components using skew distortions (`transform: skewX(10deg);`) on hover.

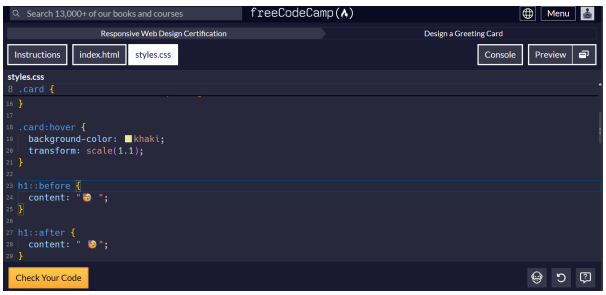

- Used `transition: transform 0.3s, background-color 0.3s ease` to ensure fluid visual animations rather than sudden state changes.

CSS CODE:

```
body {
  font-family: Arial, sans-serif;
  padding: 40px;
  text-align: center;
  background-color: brown;
}

.card {
  background-color: white;
  max-width: 400px;
  padding: 40px;
  margin: 0 auto;
  border-radius: 10px;
  box-shadow: 0 4px 8px gray;
  transition: transform 0.3s, background-color 0.3s ease
```

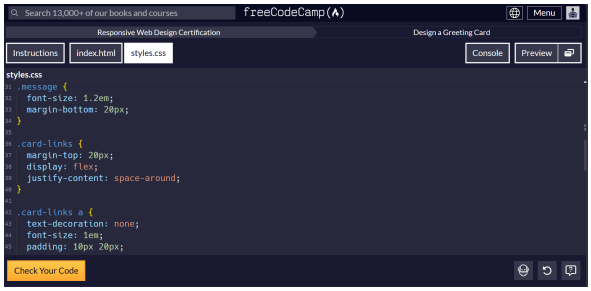

```
.card {
}

.card:hover {
  background-color: khaki;
  transform: scale(1.1);
}

h1::before {
  content: "🎂 ";
}

h1::after {
  content: " 🎂";
}
```

```
.message {
  font-size: 1.2em;
  margin-bottom: 20px;
}

.card-links {
  margin-top: 20px;
  display: flex;
  justify-content: space-around;
}

.card-links a {
  text-decoration: none;
  font-size: 1em;
  padding: 10px 20px;
```

```
.card-links a {
  padding: 10px 20px;
  border-radius: 5px;
  color: white;
  background-color: midnightblue;
  transition: background-color 0.3s ease;
}

.card-links a:hover {
  background-color: orangered;
}

.card-links a:active {
  background-color: midnightblue;
}
```

```
.card-links a:focus {
  outline: 2px solid yellow;
}

.card-links a:visited {
  color: crimson;
}

section {
  margin: 20px auto;
  max-width: 600px;
  background-color: whitesmoke;
  padding: 20px;
  border-radius: 10px;
```

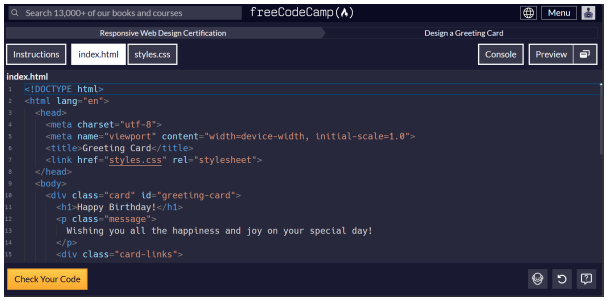

```
section {

}

section:hover{
  transform: skewX(10deg);
}
```

HTML CODE:

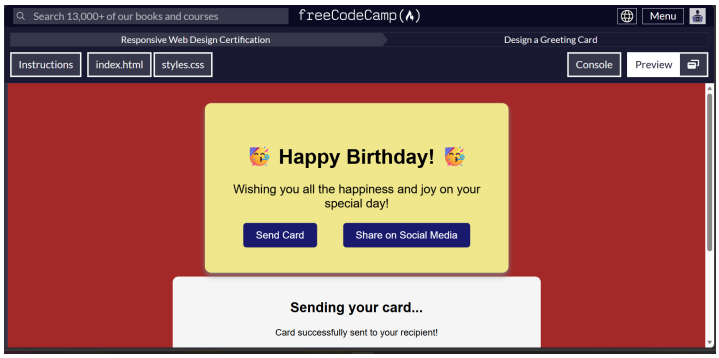

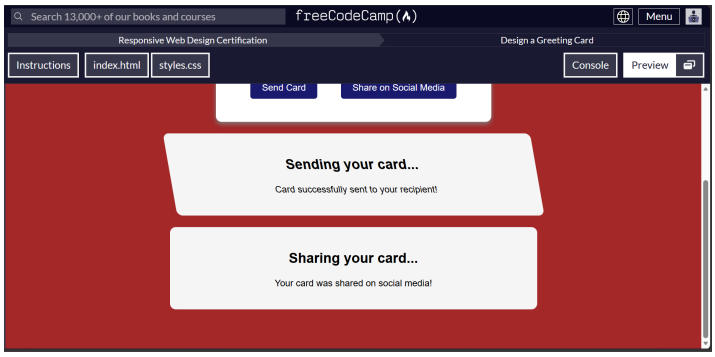

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="utf-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Greeting Card</title>
    <link href="styles.css" rel="stylesheet">
  </head>
  <body>
    <div class="card" id="greeting-card">
      <h1>Happy Birthday!</h1>
      <p class="message">
        Wishing you all the happiness and joy on your special day!
      </p>
      <div class="card-links">
```

```
      <div class="card-links">
        <a href="#send" class="send-link">Send Card</a>
        <a href="#share" class="share-link">Share on Social Media</a>
      </div>
    </div>
    <section id="send">
      <h2>Sending your card...</h2>
      <p>Card successfully sent to your recipient!</p>
    </section>
    <section id="share">
      <h2>Sharing your card...</h2>
      <p>Your card was shared on social media!</p>
    </section>
  </body>
</html>
```
