

Lab Activity Documentation: XYZ Bookstore Page HTML Structure

1. Objectives

- **Structure a Semantic Webpage:** I built a clean HTML5 layout featuring a descriptive header, content sections, and container elements (`<div>`).
-
- **Utilize Content Grouping:** Organized distinct products or sections using structured container cards with unique identifiers (`id`) and shared class styling (`class`).
-
- **Implement Interactive Elements:** Embedded call-to-action buttons (`<button>`) within component cards to simulate user interactions.
-
- **Manage Layout Containers:** I set up dedicated container regions (such as card containers and button containers) to prepare for CSS styling and layout manipulation.
-

2. Lab Implementation Overview

The lab focused on constructing an e-commerce catalog page named **XYZ Bookstore**:

- **Page Header & Intro:** Established the primary heading (`<h1>`) and introductory text to welcome users.
-
- **Product Card Components:** Created a `.card-container` housing individual product cards for different titles (e.g., *Sally's SciFi Adventure* and *Dave's Cooking Adventure*), using unique `id` attributes for specific targeting.
-
- **Actionable Elements:** Added styled buy buttons within each product card and a placeholder `.btn-container` at the bottom for checkout navigation.
-

3. Conclusion & Key Takeaways

Completing this lab reinforced core HTML structural concepts necessary for front-end development:

- **Component-Based Layouts:** Understanding how to group repetitive UI elements using `div` wrappers and classes (`card`, `btn`).
-
- **DOM Targeting Readiness:** Recognizing how unique `id` attributes (`sally-adventure-book`, `dave-cooking-book`) allow specific elements to be easily targeted by CSS or JavaScript.
-
- **UI Organization:** Gaining practical experience in structuring content hierarchy for e-commerce and multi-item web interfaces.

CODE:

The screenshot shows the freeCodeCamp editor interface. At the top, there is a search bar with the text "Search 12,900+ of our books and courses" and the freeCodeCamp logo. Below this, there are two tabs: "Responsive Web Design Certification" and "Build a Bookstore Page". The "Build a Bookstore Page" tab is active. On the left, there are two sub-tabs: "Instructions" and "index.html". The "index.html" tab is active. On the right, there are three buttons: "Console", "Preview", and a share icon. The main code area displays the following HTML code:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8" />
5   <title>XYZ Bookstore Page</title>
6 </head>
7
8 <body>
9   <h1>XYZ Bookstore</h1>
10  <p>Browse our collection of amazing books!</p>
11
12  <div class="card-container">
13    <div class="card" id="sally-adventure-book">
14      <h2>Sally's SciFi Adventure</h2>
15      <p>This is an epic story of Sally and her dog Rex as they navigate through other worlds.</p>
16      <button class="btn">Buy Now</button>
```

At the bottom of the code area, there is a yellow button labeled "Check Your Code".

The screenshot shows the freeCodeCamp editor interface, continuing from the previous one. The "index.html" tab is active. The main code area displays the following HTML code:

```
16    <button class="btn">Buy Now</button>
17  </div>
18
19  <div class="card" id="dave-cooking-book">
20    <h2>Dave's Cooking Adventure</h2>
21    <p>This is the story of Dave as he learns to cook everything from pancakes to pasta, one recipe at a
22    time.</p>
23    <button class="btn">Buy Now</button>
24  </div>
25 </div>
26
27 <p>Review your selections and continue to checkout.</p>
28 <div class="btn-container">
29 </div>
30 </body>
```

At the bottom of the code area, there is a yellow button labeled "Check Your Code".
